- English (Fluent)

REFERENCE

Mighty Conversion
Lahore, Pak

PROFILE

I started coding in 2020 with Python, expanding into Django and backend development. I built an AI "Prisoners Face Detection" System, taught coding globally, and created educational content. In 2023, I interned in Canada as a data scientist before joining Mighty Conversion, where I work in an innovative, growth driven environment while developing websites. Currently at Affinity Vibez.

Affinity Vibez
- Web Developer   2025 - PRESENT

- It's a kind of new envirment which urges to deliver quality work. Facing little challenges like 10 hours of shift with no saturday off, focused tasks needs time managment too.

Mighty Conversion   2024 - PRESENT
- PHP WordPress

- Joining Mighty Conversion felt like a breath of fresh air, with a supportive team and leadership that values respect and innovation. This positive environment reignited my passion, reminding me why I chose programming in the first place.

HBA Services   2023 - 2024
- Web Developer

- Joined HBA Services as a Web Developer, hoping for growth and collaboration but it was worthless due to toxic culture.

EDUCATION

Master of Computer Science   2020 - 2024
University of Okara
GPA: 3.21 / 4.0

Diploma in Office Management   2019 - 2019
EEA School of IT
GPA: 3.8 / 4.0
